```python
from magic import *

if __name__ == "__main__":
  t = magic()
  print("... at step {0} you have {1} triangles".format(1, next(t)))
  next(t)
  print("... at step {0} you have {1} triangles".format(3, next(t)))
  next(t)
  next(t)
  next(t)
  print("... at step {0} you have {1} triangles".format(7, next(t)))
  next(t)
  next(t)
  next(t)
  next(t)
  next(t)
  next(t)
  print("... at step {0} (the whole picture) you have {1} triangles".
          format(14, next(t)))
```
